

ROLLESTER EXTREME PRESSURE GREASE

Product Description

Rollester Extreme Pressure Grease is a true multipurpose grease, recommended for a wide range of lubricating duties, such as pivot pins and wheel bearings, where excellent anti-wear and anti-rust performance is required. Its EP additive makes it particularly suitable for the shock load and vibrating conditions found on

automotive, industrial, agricultural and earth-moving equipment.

Features & Benefits

- Outstanding extreme pressure and anti-wear performance. effectively reduce abrasion and pitting between friction surface and extending service life.
- Excellent mechanical stability keeps acceptable consistency in the process of using and avoid being washed away.
- Excellent pumpability properties.
- Do not contain any heavy metal, nitrite and other chemicals that do harm to human's health and pollute environment.

Application

- It is suitable for lubricating bearings and gears of medium load mechanical equipments, such as cold rolling mill and hot rolling mill and blast furnace accessory equipments, steel-making lifter equipment in metallurgical industry. It can also be widely used for the lubrication of equipments and heavy-duty vehicle in mine and other industry.
- Application temperature range: -20°C to 120°C.

Typical Properties

NLGI Grade	#2	#3	Test Method
Soap Type	Lithium	Lithium	
Appearance	Transparent Yellow	Transparent Yellow	Visual
Dropping point, °C	195	195	ASTM D2265
Cone Penetration, 0.1mm	265~295	230~245	ASTM D 217
Viscosity at 40 °C, cSt	145.6	160	ASTM D445
Four ball tests,mm	0.45	0.45	ASTM 2266
Four ball weld point,Kg	315	315	ASTM 2596
Timken OK load, lb	50	50	ASTM D 2509

Attentions

- Prevent water and impurities during storage and transportation.
- Do not mix with other type of grease.
- Do not heat before using.
